abdullahjutt1a@gmail.com
Pakistan (Remote, Flexible Time Zones)
Available for Remote Work

PROFESSIONAL SUMMARY

Results-driven technology professional with hands-on experience in the tech and AI field since 2019. Skilled at turning ideas into working websites, tools, and automations by combining AI-assisted development ("vibe coding") with practical business sense. Experienced in website management and social media growth, with a strong focus on fast delivery, clear communication, and reliable remote collaboration with international clients.

CORE SKILLS

AI & Development	AI-assisted coding (vibe coding), prompt engineering, ChatGPT / Claude / Gemini workflows, rapid prototyping, landing pages, small web apps
Web & Content	Website management and updates, WordPress / no-code site builders, basic SEO, AI-powered content creation and editing
Social Media	Content planning, scheduling, community engagement, page growth, caption and creative generation with AI tools
Automation & Tools	Workflow automation (n8n / Zapier / Make concepts), Google Workspace, Canva, spreadsheets, project and task tracking
Professional	Self-management, fast learner, problem solving, deadline focus, written English communication, remote collaboration

PROFESSIONAL EXPERIENCE

AI-Assisted Developer & Freelance Technologist

Self-Employed / Remote | 2019 – Present

- Design and launch simple websites, landing pages, and web tools using AI-assisted development, cutting build time from days to hours.
- Build and refine vibe-coded projects, from idea and prompt design to testing and deployment, with a focus on clean, working results.
- Apply AI tools to automate repetitive tasks such as content drafting, data organization, and routine business workflows.
- Continuously track new AI tools and platforms and bring the most effective ones into real projects.

Website & Social Media Manager

Freelance / Remote | Ongoing

- Manage website content, updates, and basic maintenance to keep sites accurate, fast, and professional.
- Plan, create, and schedule social media content across platforms to build consistent brand presence and engagement.
- Use AI tools to speed up copywriting, graphics, and content calendars without sacrificing quality.
- Communicate clearly with clients on goals, timelines, and progress to deliver dependable results.

SELECTED PROJECTS

- AI-built websites and landing pages:** responsive, mobile-friendly pages created with AI coding assistants and no-code tools.
- Vibe-coded web tools:** small interactive apps and utilities built end-to-end through prompt-driven development.
- Social media management:** content systems and posting workflows that save time and keep accounts active.

WHAT I OFFER CLIENTS

- Fast turnaround: landing pages and small sites delivered in days, not weeks.
- AI-powered efficiency with human review, so every deliverable is tested before it reaches you.
- Clear, honest communication and flexibility across US, UK, and European time zones.

EDUCATION & LANGUAGES

Education: Self-taught in technology and AI since 2019 through hands-on projects, online courses, and daily practice with modern AI tools.
